

PEE-WEE® PROFILE ROLLING MACHINES

INNOVATION FROM TRADITION

For more than seven decades, the name PEE-WEE®, has stood for precision and innovation in profile and thread rolling technology. Through the integration of the PEE-WEE®, Seny, Wanderer, and UPW brands, a strong corporate group has emerged, with over 26000 machines operating worldwide. This wealth of experience, combined with close collaboration with our customers, forms the foundation for continuous innovation.

PEE WEE® PROFILE ROLLING MACHINES

INNOVATION FROM TRADITION

MACHINE PROGRAM

Our machine series combine tradition with cutting-edge technology. They are designed for **maximum performance, precision, and customer value:**

- **UPW** – The universal flagship; fast, flexible, and reliable for almost any application.
- **E-SLIDE** – State-of-the-art fully electric technology for maximum efficiency and precision.
- **LOTUS** – Robust and proven design, ideal for small and medium-sized enterprises.
- **Y-SLIDE** – Three-roll technology for pipe threads and delicate materials.
- **TWIN FAST / SINGLE FAST** – Versatile segment rolling machines for maximum productivity.

SERVICE & REFIT

In addition to new machines, we place special emphasis on the **longevity of our installed base.**

With our **Refit Program**, existing machines are upgraded to the latest standards, economically, quickly, and precisely tailored to our customers' requirements.

Furthermore, we maintain a stock of over **30 used machines**, allowing us to respond flexibly to market demands.

AUTOMATION & ACCESSORIES

As part of the **SANTENBERG Group**, we provide comprehensive automation solutions, from part feeding and processing to final assembly.

This enables the creation of **holistic process chains**, saving our customers time, resources, and costs.

In the area of tools and accessories, we rely on in-house manufacturing. This ensures perfect interaction between machine and tool, delivering **consistent precision and maximum reliability.**
